

Learn about this template

Use this blank ERD template to begin illustrating how entities relate to each other within a system.

To customize this template, drag any shape in the entity relationship shape library onto the canvas and type the information you would like to include, then define relationships between entities using lines and type its cardinality. **OR** import your ERD straight from your database.

Pro tip: Update relationship types by clicking on a line then changing the endpoints and line styles on the properties bar.
